FYI,

I've received a copy of an exemption order signed by Bryan Shaw, Chairman, TCEQ, exempting portions of the Fusselman, Montoya and El Paso aquifers pending EPA's approval. As you may recall, this is a massive 115 sq mile exemption, to the NE of El Paso, ranging from 1000 - 4000 feet subsurface. The exemption will allow for Class V disposal of the concentrate from the Kay Bailey Hutchinson plant. The native water ranges around 8,000 TDS at those depths per the most recent draft application we have.
